INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/007449

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-7</u>	YES
	Claims _____	NO
Inventive step (IS)	Claims <u>1-7</u>	YES
	Claims _____	NO
Industrial applicability (IA)	Claims <u>1-7</u>	YES
	Claims _____	NO

2. Citations and explanations (Rule 70.7)

1 This report makes reference to the following document:

D1: EP 1 052 562 A

2 INDEPENDENT CLAIM 1

D1 discloses (the references in parentheses are to D1):

pedal support for receiving a pedal for a motor vehicle, said support comprising a base body (30) that has a shell (2) and a reinforcing element (12) allocated to the shell (2), a connecting point (8) for fixing the pedal support to a front wall and a bearing point (4) for receiving a pedal support (6), said shell being made of metal and the reinforcing element (12) being made of plastic.

Thus the subject matter of claim 1 differs from the known pedal support in that the bearing point is formed by the reinforcing element and the shell.

The subject matter of claim 1 is therefore novel (PCT Article 33(2))

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
-----------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------

Thus the problem to be solved by the present invention can be regarded as that of producing a pedal support in a cost-effective manner by using a hybrid construction.

The solution proposed in claim 1 of the present application can be regarded as inventive for the following reasons (PCT Article 33(3)):

Although D1 describes a pedal support with a hybrid construction of shell and reinforcing element, D1 does not describe the two types of material for the bearing points as in the invention. Forming the bearing points from a plastic reinforcing element and a metal shell is neither known nor obvious from the prior art.

3.1 DEPENDENT CLAIMS 2 TO 7

Claims 2 to 7 are dependent on claim 1 and therefore also meet the PCT requirements for novelty and inventive step.
